

Klinikum rechts der Isar der TU München

Client: Bauamt Technische Universität München
Project: Construction patient care building
Number of Beds: 140 regular beds
Floor Space: 6,300 m²
Project Period: 03/2002 to 12/2006
Construction Period: 07/2003 to 12/2006

Construction of a patient care building at Ismaninger Straße department neurology

Scope of Services:

- Medical engineering
- Work phases 2 to 8 according to HOAI (fee structure for architects and engineers)

Functional Areas:

- Neurological function diagnostics
- Neurology diagnostic laboratory
- Neuroradiology
- Intensive therapy 6 beds
- Stroke unit 6 beds
- Intermediate care 4 beds
- General maintenance 140 Betten

With a heavy-duty crane the five-ton magnet of the MRI had to be balanced to its destination. Therefore a special opening in the building wall was left open.
