

BUGATTI Studio

The Volkswagen AG has implemented at the historic location Molsheim (France) a studio complex for the handover of the vehicles of the brand BUGATTI.

In a park area historic buildings have been created promptly under historical preservation aspects. For the final assembly a new studio with test rigs has been built. According to the high standard of the vehicles of the brand Bugatti a building ensemble with timeless elegance has been realized.

There will be made the highest demands at the building service engineering in terms of function and design in order to satisfy the requirements of production as well as the selected group of customers' needs.

Special Features:

- Representative manufacturing building
- Central energy supply of all buildings for heating, cooling and electricity
- Floor heating
- Cooling ceilings
- Displacement ventilation
- Test bench supply
- Compressed air supply
