

Trumpf Hüttinger Elektronik, Freiburg

Client: Hüttinger Elektronik, GmbH + Co. KG, Freiburg

Project: Construction of an office and manufacturing building

Project Period: 2001 to 2006

Work Phases: 1 - 8 of HOAI
(fee structure for architects and engineers)

Special Features Heavy Current Engineering:

- Medium voltage plant
- Transformers (3x1,000 kVA)
- Building installation
- Building systems (EIB)
- Interior and exterior lighting
- Country voltage instrument transformers
- Emergency-Stop-Category 3

Special Features Weak Current Technology:

- Fire alarm system (450 detectors)
- Video surveillance / Burglar alarm system
- Satellite system for TV

Special Features other Facilities:

- Elevator (1,000 kg)
- Freight elevator (5,000 kg)
